

MOHAMMED IFAZ M

CYBERSECURITY ANALYST | SOC ANALYST | PENETRATION TESTER

Phone: +966 51 172 2498 | Email: ifazz550@gmail.com | Riyadh, Saudi Arabia

LinkedIn: [linkedin.com/in/ifazm](https://www.linkedin.com/in/ifazm) | GitHub: github.com/ifaaaaz | TryHackMe: tryhackme.com/p/lfaz4 | Portfolio: ifaaaaz.github.io

PROFILE SUMMARY

Entry-level Cybersecurity professional with a B.Sc. in Computer Science and a Diploma in Cybersecurity, experienced in SOC monitoring, alert triage, vulnerability assessment, and penetration testing through hands-on labs and projects. Proficient with Wazuh, Splunk, Nmap, Burp Suite, Metasploit, Python, and Linux. Strong understanding of OWASP Top 10, MITRE ATT&CK, incident response, and threat detection. Seeking opportunities as a Junior SOC Analyst, Cybersecurity Analyst, or Penetration Tester.

CYBERSECURITY PROJECT EXPERIENCE

Independent Cybersecurity Researcher | Self-Directed

January 2025 – Present

Wazuh SOC Lab

- Deployed Wazuh SIEM on Ubuntu and integrated 1 live Windows 11 endpoint via the Wazuh agent
- Simulated reconnaissance (Nmap port scanning) and SSH brute-force attempts using Hydra from a Kali Linux VM
- Investigated 16 correlated alerts (Logon Failure events) generated from the simulated attack activity
- Applied MITRE ATT&CK mapping to understand attacker tactics and detection coverage

DVWA Vulnerability Assessment

- Performed 10 hands-on test cases across 3 vulnerability classes (Command Injection, SQL Injection, Reflected XSS) spanning Low to Impossible DVWA security levels
- Bypassed Low and Medium-level input filters using command chaining (;, &&, |) and SQL OR-based authentication bypass
- Confirmed High and Impossible-level filters blocked exploitation via strict input validation and whitelisting
- Documented each test case with before/after screenshots, impact analysis, and OWASP-aligned remediation steps

SME Penetration Testing Lab

- Performed live reconnaissance against an authorized test host using Nmap service/version scanning and Nikto, identifying outdated OpenSSH 6.6.1p1 and Apache 2.4.7 services with associated CVEs
- Configured Metasploit's EternalBlue module (CVE-2017-0144) to demonstrate exploitation methodology against a simulated Windows Server target
- Delivered a risk-rated remediation report covering 5 finding categories with prioritized fixes

PRACTICAL EXPOSURE & LAB EXPERIENCE

- Completed 39 hands-on rooms on TryHackMe (tryhackme.com/p/lfaz4), ranking in the top 8% of users, with 8 skill badges earned
- Rooted 10+ boot-to-root/CTF machines (Mr. Robot, Blue, Vulnersity, Kenobi, RootMe, Ice, Biohazard, HA Joker CTF, Pyrat, Lookup, Smol), applying enumeration, exploitation, and privilege escalation techniques
- Completed SOC/blue-team-focused rooms including Introduction to SIEM, MS Sentinel: Introduction, Junior Security Analyst Intro, Defensive Security Intro, and Phishing Analysis Fundamentals
- Completed offensive security rooms including Pentesting Fundamentals, Red Team Engagements, Metasploit: Introduction, Attacktive Directory, Linux Privilege Escalation, SQL Injection, and Guided Pentest (Web & Infrastructure)

KEY SKILLS

Cybersecurity: Penetration Testing, Vulnerability Assessment, Ethical Hacking, Threat Detection, Incident Response, SOC Operations, Security Monitoring, MITRE ATT&CK, OWASP Top 10, Risk Management, Malware Analysis

SIEM & Monitoring: Splunk, Wazuh, Microsoft Sentinel, Log Analysis, Correlation Rules, Alert Triage, KQL

Penetration Testing Tools: Metasploit, Burp Suite, Nmap, Wireshark, SQLmap, Nikto, Hydra, John the Ripper, WPScan, OWASP ZAP, Enum4linux, Gobuster, Dirb

Networking: OSI & TCP/IP Models, IPv4/IPv6 Subnetting, Network Traffic Analysis, PCAP Analysis, Routers & Switches

Programming & Scripting: Python, Bash, HTML, CSS, JavaScript

Technical Environment: Kali Linux, Ubuntu, Windows, VirtualBox, Git, GitHub, Android Pentesting

Frameworks: MITRE ATT&CK, OWASP Top 10, OWASP Mobile Top 10, CVSS Scoring

CERTIFICATIONS

- Ethical Hacker — Cisco Networking Academy | June 2026
- Certified Red Team Operations Management (CRTOM) — Red Team Leaders | December 2025
- Linux & Web Bug Bounty Bootcamp — CappricioSec University | March 2026
- Ethical Hacking Essentials (EHE) — EC-Council | October 2025
- Foundations of Cybersecurity — Google | August 2025
- Introduction to Cybersecurity — Cisco Networking Academy | July 2025

- Cybersecurity Management Job Simulation — ANZ & Forage | July 2025
- Cybersecurity Fundamentals — IBM SkillsBuild | June 2025

TRAINING COMPLETED

- Certified Ethical Hacker (CEH) Training — EC-Council
- Cisco Certified Network Associate (CCNA) Training — Cisco

EDUCATION QUALIFICATION

Diploma in Cybersecurity Blearn Academy, Bengaluru	2025
--	------

B.Sc. Computer Science MES College, Naravoor — Kannur University	2021 – 2024
--	-------------
